AED Only

With Cabinet

DEFIBTECH LIFELINE

- 5 year battery
- 2 year adult pads
- Audio CPR instructions

AED Only

With Cabinet

Step Two: Add Services Powered By  **RescueStat**

Organization Ready

Apollo Program Management is your mission control to get your AED program off the ground and return your people safely back home each day. Survival rates for sudden cardiac arrest (SCA) are abysmal at less than 10%. Making an impact can seem like shooting for the moon. Luckily, we are experts in doing that every day, with our average survival rates at 70%.

Equipment Ready

Scout means to listen or to observe in order to obtain information or evaluate. Our patented IoT remote monitoring technology does exactly that, it senses if your AED is present and then listens for failures. If your AED fails its self-test, ScoutRMS alerts you right away to make sure your AED is always ready!

People Ready

Vera Training Solutions is our CPR/AED virtual training offering. We understand that you are busy and have listened to your demands for flexible training solutions that fit your life. We offer American Red Cross Training in a virtual format and give you everything needed, including the manikin, first aid kit, and mock AED, to practice and stay empowered.
